

Upgrade your Palm Sludge to Golden Sludge

with BDI **REPCAT** Technology

BDI's unique **RepCat Technology** turns Palm Sludge Oil into a valuable feedstock for the production of high quality BioDiesel. All FFA will be converted directly into BioDiesel exceeding the strictest international standards such as EN 14214 or ASTM D6751.
No one else can guarantee higher yields.

Don't miss this Golden Opportunity – contact BDI, the undisputed global technology leader for Multi-Feedstock BioDiesel.

For almost 20 years, BDI's core competence are technologies for converting "Waste to Energy". Ask us about our 30 reference plants worldwide.
