

Turn Trap Grease into Gold

with BDI  **REPCAT** Technology

BDI's unique RepCat BioDiesel Technology combined with our innovative Fat Purification System can take highly contaminated and deteriorated Trap Grease with no limits in FFA, turn it into Brown Grease and convert it with highest efficiency directly into ASTM/EN quality BioDiesel. No one else can guarantee higher yields but the undisputed global technology leader for Multi-Feedstock BioDiesel.

In addition our [®]enbasys ENBAFERM BioGas Technology can convert difficult industrial waste into renewable natural gas, electricity and heat.

BDI is providing new and real revenue opportunities for collectors like yourself who are dealing with unconventional feedstock.

BDI 
our future - clean energy

For almost 20 years, BDI's core competence are technologies for converting "waste to energy" with reference plants. Ask us about our 30 reference plants worldwide.
